

How to Donate Recyclable Metal for Spring Meadows Building Project

We can raise money to finish the church building faster by collecting recyclable metal. Without this project we must rely on the actual money we donate! When we all pitch in, the money metal makes really makes a difference. Let's get our church building project done!

3 Ways You Can Help

Here's how you can help the building fund without using money.

#1 Bring recyclable metal to Landers Recycling

3024 Apopka Blvd, Apopka, FL 32703

Monday – Friday 8AM–4PM

Ask scale attendant to put metal on **Spring Meadows'** account. Metal must be delivered to Landers Recycling - do **not** call Landers for pick-up.

#2 Bring recyclable metal to church on potluck Sabbath

Metal is picked up from the "roll-up door" in the back of the church each potluck Sabbath.

#3 Pick-up and deliver large recyclable metal items for other members

Have a truck or trailer to haul larger pieces?

Text your name to (407) 493-5117 to be added to the list of potential pick-up drivers.

What Counts as Recyclable Metal

Basic rule: the more metal and less other material the more money.

- Aluminum Cans – *beverage cans* (best if **not** crushed)
- Large home appliances – *washer, dryer, refrigerator, dishwasher, AC unit*
- Cars
- Metal autoparts
- Copper – *tubing or wiring*
- Nuts, bolts, screws, nails, staples, paperclips...
- Small home appliances – *blender, vacuum, toaster, fans* (*plastic removed*)
- Metal furniture
- Metal mop/broom handles (*plastic removed*)
- Lead-Acid batteries
- Christmas lights
- Computers
- Brass

What if I don't have any metal?

How to find metal when you don't have much in your own house:

- Patrol your neighborhood on trash day to pick-up recyclable metal from trash
- Pick up screws and nails while walking (Helps to prevent flat tires too!)
- Ask your friends and neighbors if they can save metal for you to recycle
- And of course, save any aluminum cans from your kitchen

God multiplies everyone's contributions big or little.

Family Learning Activity

Enjoy disassembling items like vacuums to rescue metal pieces (especially electric motors).

For Best Results

Make your efforts go farther with these tips.

- Do **not** crush aluminum cans
- Put aluminum cans in tied bag
- Remove as much plastic as possible. Safely disassemble items, or smash items to remove plastic. (The church gets more money when there is less plastic)
- Of course, thou shalt not steal metal to donate
- Safety first!

Do Not Bring

Bringing the wrong stuff slows things down.

- Trash
- Glass
- Paper
- Plastic
- Other non-metal recyclables
- Containers with liquids, for example gas cans or paint cans
- Anything that might be radioactive
